

รหัสชุมนุม 36

Club Name: Experiments and puzzle club

Objectives:

Students will be able to:

- 1 Know procedures of how to do experiments
- 2 Know safety precautions of experiments
- 3 Talk about all steps to follow while doing experiments
- 4 Use difficult vocabulary and understanding meaning of words

The process of implementation:

- 1 Doing puzzles with students to make atmosphere fun and helping with vocabulary.
- 2 Doing experiments with students to help them understand what science is about
- 3 Let students do research on what experiments they are interested in
- 4 Making students aware of all the safety precautions they need to follow when they do experiments.

Measurement and evaluation

- 1 See how students participate while having book club
- 2 Evaluate students presence and absence in club.
- 3 How students understanding is when explaining
- 4 Student's behavior in class.

The results that are expected to receive:

- 1 Students can start conducting experiments on their own.
- 2 Students can follow safety precautions.
- 3 Students can better themselves and vocabulary.
